Dean, Goldman School of Public Policy, July 2009-present. The Goldman School, founded at the University of California, Berkeley in 1969, is one of the nation's first graduate programs of its kind. Today it is ranked among the very top policy programs in the country and is recognized nationally and internationally as a source of incomparably qualified professionals in the field. Embracing the realms of both domestic and international policy, the School prepares students for careers including policy analysis, program evaluation, program management, and policy and political leadership. GSPP graduates enjoy an outstanding rate of employment and career advancement, working in government, in the private and nonprofit sectors, in research organizations, and as consultants. As Dean, Henry Brady has diversified and expanded the faculty, revamped and enlarged Global Executive Education, started a new mid-career Masters of Public Affairs degree, instituted a program of producing MOOCs and other forms of online education, started UC Public Policy Web-TV, enhanced the School's development operation, created several new research centers, incorporated a major research center on higher education, focused on faculty improvement through peer review and peer working groups, developed a strategic plan tied to budgetary allocations, instituted programs to enhance classroom climate, developed and moved along a proposal for a third building for the school, and significantly increased the school's ongoing revenues and philanthropy. He has also been active in the larger campus as co-principal investigator for the Moore-Sloan funded Berkeley Institute for Data Science, the Haas Institute for a Fair and Inclusive Society (leading clusters on income disparities and religious diversity), the Information Technology Strategy Committee, chair of major searches (e.g., Dean of Journalism, Dean of Social Sciences, Academic Director of the Religious Diversity Cluster), and a spokesperson for higher education through his affiliations with the Campaign for College Opportunity and the Lincoln Project of the American Academy for Arts and Sciences.

Director, UC Berkeley Survey Research Center (SRC), 1999-August 2009. The SRC, originally created in 1958, developed and applied systematic methods for inquiring about people's attitudes and behaviors, observing their relationships and actions, and collecting information about their histories and experiences. SRC had an international reputation for collecting, processing, and disseminating survey, administrative, and ethnographic information. The SRC was a home for an interdisciplinary set of a dozen faculty members, organized speaker series and conferences, undertook large-scale research projects involving complicated data collection and data analysis methods, maintained an archive of quantitative social science data for the Berkeley campus, managed a telephone interviewing facility, and managed extramural funding for its faculty and staff of about 100 people. The SRC was a research center, a data collection center, and a data archive. The SRC offered high-quality data collection and analysis services to faculty researchers and governmental agencies in a competitive and volatile environment which placed special demands on its management. As Faculty Director, Henry E. Brady reported directly to the Vice Chancellor for Research, and the unit's approximately 100 staff and affiliates included 12 faculty members, 18 graduate students, 20 undergraduate students (many of whom worked as survey interviewers), 16 survey professionals and 8 data archive and data analysis professionals (of whom six were PhDs), 9 supporting staff, and a variable number of survey interviewers and data entry clerks (between 10 and 40). In addition to the building at 2538 Channing Way on the south side of the Berkeley campus, the SRC operated a nearby call facility with 32 interviewing stations. The Survey Research Center ceased operations in 2010 as a cost saving measure in response to cuts during UC Berkeley's budget crisis.

Director, UC DATA (University of California Data Archive and Technical Assistance), 1992-August 2009. UC DATA (now D-Lab) is UC Berkeley's principal archive of digitized social science data and statistics which supports the social science data needs of UC Berkeley researchers by providing access to a broad range of computerized social science data to faculty, staff, and students at UC Berkeley. UC DATA develops new datasets from administrative and other data sources, provides advice to researchers and state agencies on ensuring data confidentiality, provides access to non-public Census data through the California Census Research Data Center (CCRDC)--a partnership with the US Census Bureau, serves as part of the US Census Bureau's State Data Center Network, and acts as official representatives for ICPSR and the Roper Center.

Director of Graduate Studies, UC Berkeley, 1992-1994. As Director of Graduate Studies, Henry Brady reported to the Chair of the Political Science Department and oversaw the graduate program. He worked with Political Science staff and faculty to ensure a strong graduate program and to help graduate students make their way through it.

Director, Center for the Study of Politics and Society, National Opinion Research Center, 1988---1990—Faculty Director of a Center including the General Social Survey and other political and social research.

Director, Harvard Data Center, 1984-1987. As Director, Brady expanded the Harvard Data Center by updating its data management system and developing on-site computer facilities for students in a new facility.
