Master's Degree in Public Policy with a Concentration in Poverty and Inequality [1]

The Center has developed an interdisciplinary honors program focused on poverty and inequality that will be built around three courses generously supported by The Elfenworks Foundation.

As poverty and inequality are increasingly understood as major social problems, graduate student interest in studying them has taken off, and there is, accordingly, much demand for a Stanford University degree in public policy, poverty, and inequality. The Center, in collaboration with the Department of Sociology, offers an interdisciplinary two-year Master's Degree in Public Policy (MPP) with a concentration in the analysis of poverty and inequality. The degree is granted by the School of Humanities and Sciences and administered by the Stanford Institute for Economic Policy Research (SIEPR) in conjunction with the undergraduate interdisciplinary Public Policy program.

Eligibility and Timing

The MPP program is principally intended for Stanford University students who have been admitted to a Ph.D. program. The joint MPP entails an additional year of courses that are taken mainly, but not entirely, in the second year at Stanford University. Although most additional coursework occurs in the second year, MPP students are also required to take a research practicum course in their third year.

Core Courses

The core MPP courses taken in the second year at Stanford University cover such topics as economics, benefit-cost analysis, organizations, econometrics, cognitive psychology, law and economics, and political philosophy.

Concentration Courses

In addition to completing these core courses, all MPP students must choose a concentration from among dozens of possible concentrations, one of which is in Poverty and Inequality. This concentration may be completed by taking three additional courses from among an approved list of electives. These additional courses will, for most students, count toward the MPP and
Ph.D., meaning that taking them does not slow progress toward securing the Ph.D. [more] [2]:
