Individuals who are selected to participate in the Russell Sage Foundation call will access American Voices Project data through a secure server. The following software will be installed on the server:

- NVivo
- SAS
- Stata
- R
- Office
    - Word
    - Excel
    - PowerPoint
    - MediaPlayer
- Python 3.7
- Jupyter Notebook
- Tensorflow
- Scikit-learn
- Tmux
- Vim
- Virtualenv
- GCC
- gitlab-ce

If you will require additional software to conduct your analyses, you must let us know when you submit your proposal and we will investigate whether we can accommodate your request.
